EDUCATION

SAINTGITS COLLEGE OF ENGINEERING

Btech in Computer Science and Engineering

CGPA: 8.72

ITHITHANAM HIGHER SECONDARY SCHOOL

State board | Graduated in 2022 with 98%

PROJECTS BUILD

FarmGuard

FarmGuard is a website designed to enhance agricultural practices by providing real-time monitoring and analysis of crop health. It assists farmers in three key areas: crop recommendation, fertilizer optimization, and plant disease detection.

EventSafe

EventSafe is a website for event safety and management, featuring a panic button that sends live location alerts via SMS. It also includes event registration and an FAQ section for better attendee support.

Hospital Inventory Management

Hospital Inventory Management is a web-based system that efficiently tracks and manages medical supplies, equipment, and stock levels using MySQL, HTML, CSS, and JavaScript. It ensures real-time updates, user-friendly interactions, and organized inventory management to streamline hospital operations.

commUnity

The commUnity app is a platform designed for seamless complaint registration, vendor management, and emergency support within a community. It enables users to submit complaints, sellers to register their businesses, and admins to oversee and manage operations, ensuring efficient service coordination and real-time updates.

I affirm that all statements made in this resume are true and accurate to the best of my knowledge and belief.

ACHIEVEMENTS
